

# ABSTRACT

A compound represented by formula (I) below; a process for producing the compound by cultivating a microorganism belonging to the genus *Aspergillus* and recovering the above-mentioned compound from the culture; an angiogenesis inhibitory agent containing as an active ingredient the compound; and an *Aspergillus* sp. F-1491 (FERM BP-8288) strain capable of producing the compound.

10 In formula (I), R represents a methyl group or an ethyl group, R<sup>1</sup> represents a hydrogen atom, a chlorine atom, a hydroxyl group or a methoxy group, R<sup>2</sup> represents a hydroxyl group, or R<sup>1</sup> and R<sup>2</sup> taken together form an epoxy ring structure.
